**DETAILED ACTION**

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-21 are rejected under 35 U.S.C. 102(e) as being anticipated by Firgo et al.

Firgo et al. teach extruding a composition containing water, cellulose and tertiary amine oxide through a plurality of extrusion orifices, in a row to obtain a continuously molded body. Forming a substantially planar curtain by the individual continuously molded body; immersing the curtain into a precipitation bath and deflecting the curtain in the precipitation bath by a deflector fully anticipates applicant's claims as filed. With respect to the limitations of an air gap used for stretching, this feature is taught in Claim

1 of Firgo, where "stretching an extruded filament in an air gap" is claimed. [Note the abstract, Column 6, lines 45-67, Column 7, lines 1-67 and Column 8, lines 1-18]
